

Network Engineer for music streaming services

Do you listen to music? Would you like to help us build the next generation service for streaming music content?

Our current generation of music services is amongst the most popular in Denmark, as well as in the other territories where we're present. We continuously strive to do better, to stay ahead of competition and the users' expectations. Come join us setting the new standards for how music services will look like in the future. We need you on board!

You will be part of a highly motivated network team, working from the very heart of Copenhagen. Every day is a new adventure in monitoring, maintenance and expansion of company's networks and services. Not to forget resolving possible problems and coming up with well thought solutions as well as possible improvements. The overall goal is to ensure maximum performance, availability and security of our services.

What we are looking for:

- You have a minimum of two years of experience in computer networks
- Ethernet, TCP/IP, switches, routers, and firewalls have no secrets for you
- Experience with load balancers and HA solutions is a plus
- It's a big plus if you have hands on experience with either of: Juniper's JUNOS, F5's TMOS
- You have a desire to be part of the "next big thing"

Who we are:

- +15 years of experience in the digital music industry and this is why our hand-picked and highly skilled team of specialists, coming from all over the world, can offer elaborate solutions.
- Our clients represents different backgrounds and industries: tele operators, retail chains and media companies.
- Our offices are based in three very hot and exciting places: Copenhagen, Berlin and Kiev.

Want to join the team? Interested in more details? Please don't hesitate to get in touch with us. Please submit your application to recruiting@247e.com as soon as possible since we will be selecting and interviewing continuously. Please note that only candidates who have Danish work permit and can participate in a personal interview in Copenhagen will be accepted.
